

Lawn Care 2018

Lawn Comber (de-thatcher / power-rake / turf rake)**Model # TR-20H**

\$ 49.00 4-hours

\$ 79.00 8-hours

The benefits of lawn combing: Thatch is a dense mat of roots, stems and grass clippings that accumulates between the soil and growing blades of grass. As thatch builds, adequate amounts of vital turf nutrients including water, oxygen, and fertilizer are un-able to reach the root system. Dethatching at regular intervals promotes denser growth and ensures you'll have a vibrant lawn.

Specifications: 5.5-hp Honda gasoline engine, 18" combing width, adjustable depth, steel flail blades, unit weight 135-lbs.

Folded, Transport dimension: 29.5" high x 27" wide x 30.5" long.

Aerator (core aeration)**Model # CA-18H**

\$ 69.00 4-hours

\$ 99.00 8-hours

The benefits of aeration: Soil buildup can have an adverse effect on the health of turf. When soil is compacted, the grass is unable to establish a healthy root system because adequate amounts of vital turf nutrients are unable to reach the root system. Aeration promotes deeper root growth for a lawn that is more lush, healthy, and drought resistant.

Specifications: 4.0-hp Honda gasoline engine, 18" aeration width, up to 3" aeration depth at 3/4" diameter, unit weight 278-lbs (206-lbs with weights removed).

Folded, Transport dimension: 29" high x 28" wide x 40" long.

Seeder (over-seeder)**Model # S22H5DA**

\$ 69.00 4-hours

\$ 99.00 8-hours

Overseeding for better turf: Lawns that have thinning or bare patches can be restored by overseeding. For best results, we recommend overseeding in two applications, with the second application made at a 45-degree angle to the first. You'll notice a distinct crosshatch pattern in the effected soil as blades virtually "plow" precisely aligned rows of seeds into the topsoil.

Specifications: 5.5-hp Honda gasoline engine, 22" seeding width, adjustable depth up to 1", Hopper capacity of 30-lbs, steel delta blades spaced 1" apart, unit weight 150-lbs.

Folded, Transport dimension: 26" high x 31" wide x 36" long.
